1. GENERAL INFORMATION

1.1 Application Overview

This application provides a statistical guide to Kenyan counties in the most intuitive and visually appealing way. A user interacts with it by tapping tabs and columns to view data.

The application has been developed by Samuel Geno as an IBM interview requirement. It is developed for iPads running iOS version 5.0 and above.

1.2 Authorized Use Permission

Any unauthorized use of application or copying of data, software, reports, and documents is prohibited.

1.3 Points of Contact

3. GETTING STARTED

3.1 Download, Installation and App Launch

To install the app on a device

1. Connect the testing device to a Mac running iTunes.
2. Double-click the iOS App file that has been sent to you.
3. In iTunes, click the device in the upper-left corner of the window.
4. Click the Apps button.

The app appears in the iTunes Apps list.

5. Under Apps, choose “Sort by Name” or “Sort by Kind” from the pop-up menu.

An Install or Remove button appears adjacent to the app.

6. If an Install button appears, click it.

The button text changes to Will Install.

7. Click the Apply button or the Sync button in the lower-right corner to sync the device.

The app is uploaded to the device so that you can start testing.

4. USING THE APPLICATION

4.1 View Data
